Volume Contents, Issues 1–8

VOLUME 17, No. 1

Non-linear principal components analysis: an alternative method for finding patterns in environmental data 1
R. N. Ellis, P. M. Kroonenberg, B. D. Harch and K. E. Basford

The exponentiated Gumbel distribution with climate application 13
S. Nadarajah

Extreme value predictions based on nonstationary time series of wave data 25
C. N. Stefanakos and G. A. Athanassoulis

Statistical analysis of temperature impact on daily hospital admissions: analysis of data from Udine, Italy 47
F. Pauli and L. Rizzi

Exploring between site differences in water quality trends: a functional data analysis approach 65
B. Henderson

A comparative study of the use of GAM and GLM in air pollution research 81
S. He, S. Mazumdar and V. C. Arena

Evaluating water quality using power priors to incorporate historical information 95
Y. Duan, K. Ye and E. P. Smith

VOLUME 17, No. 2

An autoregressive model with time-varying coefficients for wind fields 107
P. Ailliot, V. Monbet and M. Prevosto

Time series analysis of wind speed with time-varying turbulence 119
B. T. Ewing, J. Brown Kruse and J. L. Schroeder

An empirical method for inferring species richness from samples 129
P. A. Murtaugh and D. S. Birkes

Spatiotemporal generation of long-range dependence models and estimation 139
M. P. Frías, M. D. Ruiz-Medina, F. J. Alonso and J. M. Angulo

On the ratios for extreme value distributions with application to rainfall modeling 147
S. Nadarajah,y and A. H. El-Shaarawi

Comparison of ozone concentrations at the surface and in the lower troposphere 157
E. Puckrin, D. L. Travers and W. F. J. Evans

Consistent estimation and testing in comparing analytical bias models 167
M. de Castro, H. Bolfarine and M. V. de Castilho

Estimating tree resin dose effect on termites 183
L. Qian and S. Ryu

Estimation of transport and kinetic parameters using analytical solutions of the 2D advection-dispersion-reaction model 199
F. Catania, M. Massabò and O. Paladino

VOLUME 17, No. 3

Special Issue
TIES Conference, 2003

Editorial 217
R. Correll

Making environment statistics useful: a Third World perspective 219
T. Polfeldt

Comparison of the power of the tests in one-way ANOVA type model with Poisson distributed variables 227
Z. Hrdličková

Kernal estimates of hazard functions for carcinoma data sets 239
I. Horová, J. Zelinka and M. Budíková

A resampling technique for estimating the power of non-parametric trend tests 257
A. Nordgaard and A. Grimvall

A Web-based rainfall atlas for Southern Africa 269
W. Zucchini and O. Nenadić

Stream health index for the Puget Sound Lowland 285
G. Chiu and P. Guttorp

VOLUME 17, No. 4

A model for external drift kriging with uncertain covariates applied to air quality measurements and dispersion model output 309
J. van de Kassteele and A. Stein

Spatial sampling design under the infill asymptotic framework 323
Z. Zhu and H. Zhang

Comparison of missing value imputation methods for crop yield data 339
R. S. Lokupitiya, E. Lokupitiya and K. Paustian

How well can animals navigate? Estimating the circle of confusion from tracking data 351
J. E. Mills Flemming, C. A. Field, M. C. James, I. D. Jonsen and R. A. Myers

Approximately optimal spatial design approaches for environmental health data 363
G. Xia, M. L. Miranda and A. E. Gelfand

Comparison of a new variant of PMF with other receptor modeling methods using artificial and real sediment PCB data sets 387
P. A. Bzdusek and E. R. Christensen

Estimating the bivariate mean vector of censored environmental data with Box–Cox transformations and E-M algorithm 405
J. Freeman and R. Modarres

VOLUME 17, No. 5

Statistical characterization of circulation patterns and direction of turbulent flow over a waveform structure 417
R. Mazumder and B. S. Mazumder

A sequential Monte Carlo approach for marine ecological prediction 435
M. Dowd

Nonparametric prediction intervals for the future rainfall records 457
M. Z. Raqab

Estimating within-field variation using a nonparametric density algorithm 465
A. Castrignanò, G. Buttafuoco, M. Pisante and N. Lopez

Spatial modelling using a new class of nonstationary covariance functions 483
C. J. Paciorek and M. J. Schervish

A comparison between two receptor models to determine the source apportionment of atmospheric pollutants 507
M. Caselli, G. de Gennaro and P. Ielpo

Estimating soil properties in heterogeneous land-use patches: a Bayesian approach 517
J. J. Oleson, D. Hope, C. Gries and J. Kaye

VOLUME 17, No. 6

Special Issue
TIES Conference, 2004

Editorial 527
R. McRoberts

Analyzing wildfire threat counts using a negative binomial regression model 529
J. A. Quintanilha and L. L. Ho

Sampling and variance estimation on continuous domains 539
C. Cooper

A Bayesian hierarchical extreme value model for lichenometry 555
D. Cooley, P. Naveau, V. Jomelli, A. Rabatel and D. Grancher

Network design for verification of ceiling and visibility forecasts 575
E. Gilleland and T. L. Fowler

Surface structures and tiered topography 591
W. L. Myers

Landscape-based geostatistics: a case study of the distribution of blue crab in Chesapeake Bay 605
O. P. Jensen, M. C. Christman and T. J. Miller

Probabilistic risk assessment for wildfires 623
D. R. Brillinger, H. K. Preisler and J. W. Benoit

Optimal network design for spatial prediction, covariance parameter estimation, and empirical prediction 635
D. L. Zimmerman

Adjustment procedures to account for non-ignorable missing data in environmental surveys 653
B. Munoz and V. M. Lesser

Iterated confirmatory factor analysis for pollution source apportionment 663
W. F. Christensen, J. J. Schauer and J. W. Lingwall

VOLUME 17, No. 7

On using expert opinion in ecological analyses: a frequentist approach 683
S. R. Lele and K. L. Allen

Calculating the optimal number of contaminant samples by means of data worth analysis 705
T. Norberg and L. Rosén

A Bayesian hierarchical model for local precipitation by downscaling large-scale atmospheric circulation patterns 721
J. M. Mendes, K. F. Turkman and J. Corte-Real

Spatial-temporal model for ambient air pollutants in the state of Kuwait 739
F. A. Al-Awadhi and S. A. Al-Awadhi

Tempo-spatial covariance structure of lentil yield and water use efficiency from supplemental irrigation trials 753
M. Singh, T. Oweis, M. Pala and A. Sarker

A Bayesian semiparametric model for organism based environmental reconstruction 763
S. Bhattacharya

VOLUME 17, No. 8

Statistical aspects of rainfall fields in Southern Italy during a rain enhancement experiment 777
A. Orasi and G. Jona Lasinio

Markov chain models for extreme wind speeds 795
L. Fawcett and D. Walshaw

Maximum likelihood estimators of population parameters from doubly left-censored samples 811
A. E.-M. A. Aboueissa and M. R. Stoline

Growth curve models for stochastic modeling and analyzing of natural disinfection of wastewater 827
W. Bischoff, M.-N. Lo Huang and L. Yang

A nonparametric analysis of the spatial distribution of *Convolvulus arvensis* in wheat-sunflower rotations 849
M. Francisco-Fernández, M. Jurado-Expósito, J. D. Opsomer and F. López-Granados
